Service Yards

2005-2009 Adopted Capital Improvement Program

Overview

Introduction

City Service Yards house all the support shops that maintain City vehicles, buildings, sanitary sewers, storm drains, streets, and related facilities. The Service Yards Capital Program the construction and capital improvements for these shops. The current Service Yards include the Main Yard (at Sixth and Taylor Streets), the Mabury Yard (on Mabury Road near Highway 101), the South Yard (at Monterey Road and Skyway Drive), the West Yard (on Williams Road near Lawrence Expressway), and the Central Service Yard (at Senter and Phelan). 2005-2009 Adopted Capital Improvement Program (CIP) provides funding of \$46.4 million, of which \$11.8 million is allocated in 2004-2005.

This program is part of the Strategic Support City Service Area (CSA) and supports the following outcome: Safe and Functional Public Infrastructure, Facilities, Materials and Equipment. The operations housed in the Service Yards not only support the Strategic Support CSA, but also Transportation CSA, Environmental and Utility Services CSA and Recreation & Cultural Services CSA.

Program Priorities and Objectives

The objective of the Service Yards Program is to maintain and improve the existing conditions at the Service Yards by implementing projects to reduce safety hazards, increase efficiencies, and provide necessary equipment and materials for operations. In addition, as a result of a General Fund balancing strategy approved in the current year, a significant allocation of resources in this program continues to be

directed towards relieving the General Fund of its previous obligations to pay Central Service Yard Phase I debt service. This shift 2003-2004 occurred in and programmed for two additional years after which the General Fund is scheduled to resume payment responsibilities. This action has caused the implementation of the Central Service Yard Phase II project to be delayed until 2006-2007. Central Service Yard Phase II is, however still anticipated to proceed at that time in this program, and will further develop the remaining facility capacity to accommodate services located in other facilities.

Sources of Funding

The Service Yards CIP receives 8.78% of the City's Construction and Conveyance Tax. Approximately 97% of this tax is derived from a transfer tax imposed upon each transfer of real property with the remaining 3% generated from a construction tax levied on most types of construction. For the 2005-2009 CIP, it is assumed that collections allocated to the Service Yards Capital Program will fall to \$1.6 million in 2004-2005 (from the current year estimate of \$2.1 million) and will level off at \$1.4 million annually for each of the remaining years of the CIP. These estimates are based on the assumption that the prolonged economic downturn that we have suffered for several years will eventually impact housing sales, which generate this revenue. The budgeted estimates in the 2005-2009 CIP reflect what is believed to be a more sustainable level of housing resale activity, bringing collections in line with 1996 levels before the double-digit growth occurred in this category.

Service Yards

2005-2009 Adopted Capital Improvement Program

Overview

Sources of Funding (Cont'd.)

In addition, based on prior Council action, the Service Yards Capital Program is scheduled to receive several millions in proceeds from the sale of Main Yard and the Julian-Stockton Warehouse and \$12.5 million from bond proceeds to support Phase II of the Central Service Yard.

Program Highlights

Central Service Yard Phase I Debt Service

Up until 2002-2003, the General Fund was paying the debt service for Phase I of the Central Service Yard expansion. As a General Fund cost savings measure, this debt service was approved to be assumed by Service Yards Construction and Conveyance Taxes for three years beginning in 2003-2004. This strategy will save the General Fund \$1.76 million annually. Several projects in this program been dropped or delayed accommodate this funding strategy. major impact of this strategic approach, however, has been the deferral of the Central Service Yard Phase II project for three years.

Central Service Yard Phase II

A Service Yards Study was undertaken by an independent consultant to evaluate all the existing Service Yards' capacity and utilization. As a consequence of the study, an overall strategic plan was developed for the optimum utilization of the Service Yards. However, as described above, due to the current economic situation, the Central Service Yard Phase II project has been deferred while a portion of the C&C Taxes that would have otherwise been used for this

project are reallocated to the Central Service Yard Phase I debt service.

Under the revised schedule, planning and design for the Phase II project are expected to resume in 2005-2006 with construction scheduled to begin in 2006-2007. The project budget in the 2005-2009 CIP includes a reserve of \$35.5 million along with a \$200,000 allocation for design work. To fund this project, a combination of bond proceeds (\$12.5 million), the sale of property (\$16.5 million), and accumulated C&C Tax revenues and proceeds from the sale of properties in prior years (\$6.7 million) will be utilized. The properties which will be put up for sale in this CIP include the Main Yard, the parking lot across the street from the Main Yard and the Julian-Stockton Warehouse. The funding for this project is significantly higher (\$14.3 million) than the amount included in the 2004-2008 CIP primarily because anticipated value of the Main Yard has been increased by almost \$10 million to better reflect market conditions and the amount of bond proceeds that can be supported by the C&C Fund has been increased by \$2.5 million. With this additional funding, it is now anticipated that the Phase II project can be completed.

Major Changes from the 2004-2008 Adopted CIP

Major changes from the 2004-2008 Adopted CIP include the following:

 Service Yard Management support added to the CIP to cover direct services provided to the City's network of service yards.

Service Yards

2005-2009 Adopted Capital Improvement Program

Overview

Major Changes from the 2004-2008 Adopted CIP (Cont'd.)

- A transfer to the General Fund in the amount of \$700,000 is programmed in 2004-2005 to return proceeds from the sale of properties that originally were going to be used for the Central Service Yard Phase II Project. This will not jeopardize completion of the Central Service Yard Phase II Project, as higher than anticipated 2003-2004 C&C revenues will be sufficient to offset the transfer.
- An increase of \$14.3 million to the Central Service yard Phase II project reserve. This reserve will fully fund the Phase II project and was increased due to a revised appraisal for the Main Yard.

Operating Budget Impact

There are no additional operating and maintenance costs associated with the projects in the 2005-2009 Adopted CIP.

Council Approved Revisions to the Proposed Capital Improvement Program

2005-2009 Adopted Capital Improvement Program **Detail of Capital Projects**

8. Transfer Surplus Property Sales Proceeds

CSA:

Strategic Support

Initial Start Date:

2004-2005

CSA Outcome:

Safe and Functional Public Infrastructure, Facilities,

Revised Start Date:

Materials and Equipment

Initial Completion Date:

2004-2005

Department:

General Services

Council District:

N/A

Revised Completion Date:

Location:

N/A

Description:

The proceeds from the sale of three General Fund properties (Las Plumas Warehouse, Empire Yard, and Children's Shelter) that were allocated in part to the Service Yards will now be transferred back to the General Fund. A portion of these proceeds were originally intended to be used towards the Central Service Yard Phase II Project. However, because the 2003-2004 C&C Tax collections are tracking much higher than anticipated, there are sufficient tax revenues to offset this transfer without

impacting the Phase II project.

Justification:

This transfer will be used towards the 2004-2005 General Fund shortfall, while not impacting the

Central Service Yard Phase II project.
